

Course Specification

(Bachelor)

Course Title: **Data Structures**

Course Code: **321CCS-3**

Program: **Bachelor of Science in Computer Science**

Department: **Department of Computer Science**

College: **Computer Science and Information Systems**

Institution: **Najran University**

Version: **2.0**

Last Revision Date: **August 2022**

Table of Contents

| | |
|---------------------------------------------------------------------------------------------|---|
| A. General information about the course: | 3 |
| B. Course Learning Outcomes (CLOs), Teaching Strategies and Assessment Methods | 4 |
| C. Course Content | 6 |
| D. Students Assessment Activities | 6 |
| E. Learning Resources and Facilities | 6 |
| F. Assessment of Course Quality | 7 |
| G. Specification Approval | 7 |

A. General information about the course:

1. Course Identification

1. Credit hours: (3)

3 (2, 2, 1) [Theory, Lab, Tutorial]

2. Course type

A. University College Department Track Others
 B. Required Elective

3. Level/year at which this course is offered: (Level 5/Year 3)

4. Course General Description:

Study of common Abstract Data Types (ADTs), basic data structures and design and analysis of algorithms. Common ADTs: stack, queue, list, tree, priority queue, map and dictionary. Basic Data structures include arrays, linked lists, heaps, hash tables, and search trees. Basic design and analysis of algorithms cover asymptotic notation, recursive algorithms, searching and sorting, tree traversal, and graph algorithms.

5. Pre-requirements for this course (if any):

211CCS-4

6. Co-requisites for this course (if any):

None

7. Course Main Objective(s):

Upon the successful completion of this course, students will be able to:

1. Describe basic ADTs (stack, queue, array, list, node list, priority queue, tree, map and dictionary) and their related data structure implementations (array, single linked structure, double linked structure, heap, hash table, binary search tree, AVL tree).
2. Distinguish between Abstract Data Types (ADTs), data structures and algorithms.
3. Calculate the costs (space/time) of data structures and their related algorithms, both source code and pseudo-code, using the asymptotic notation (O()).
4. Recognize basic concepts and techniques (recursive, sorting, searching, graph) used in the design of basic algorithms.
5. Implement basic algorithms and ADTs using different data structure strategies.
6. Decide which type of data structures and algorithms best suits the problem they are solving.

2. Teaching mode (mark all that apply)

| No | Mode of Instruction | Contact Hours | Percentage |
|----|--------------------------------------------------------------------------------------------------------|---------------|------------|
| 1 | Traditional classroom | 75 | 100% |
| 2 | E-learning | | |
| 3 | Hybrid <ul style="list-style-type: none"> • Traditional classroom • E-learning | | |
| 4 | Distance learning | | |

3. Contact Hours (based on the academic semester)

| No | Activity | Contact Hours |
|--------------|-------------------|---------------|
| 1. | Lectures | 30 |
| 2. | Laboratory/Studio | 30 |
| 3. | Field | |
| 4. | Tutorial | 15 |
| 5. | Others (specify) | |
| Total | | 75 |

B. Course Learning Outcomes (CLOs), Teaching Strategies and Assessment Methods

| Code | Course Learning Outcomes | Code of PLOs aligned with the program | Teaching Strategies | Assessment Methods |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.0 | Knowledge and understanding | | | |
| 1.1 | Describe basic ADTs (stack, queue, array, list, node list, priority queue, tree, map and dictionary) and their related data structure implementations (array, single linked structure, double linked structure, heap, hash table, binary search tree, AVL tree).. | K ₁ | <p>TS-1: Relate Course Learning Outcomes (CLOs) to the topics</p> <p>TS-2: Lectures: using PPT presentation to address verbally in front of students the concepts associated with examples with taking help of writing on the board as needed.</p> | <ul style="list-style-type: none"> - Class Quizzes. - Assignments. - Midterm exams (Each exam consists of multiple choice questions, true/false, fill-in-the-blanks, and theoretical questions.) |

| Code | Course Learning Outcomes | Code of PLOs aligned with the program | Teaching Strategies | Assessment Methods |
|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.2 | Distinguish between Abstract Data Types (ADTs), data structures and algorithms. | K ₁ | <p>TS-3: Motivating students to work at home, to search from the internet, to read related reference books by giving them assignments related to the analysis of algorithms and data structures.</p> <p>TS-4: Let students solve the problems related to the complexity of different algorithms in small groups and give corrections on their solutions during class.</p> <p>TS-5: Motivating students to be active during class by asking questions regularly.</p> <p>TS-6: Giving students tutorials related to the importance of data</p> | - Final Exam |
| 1.3 | Recognize basic concepts and techniques (recursive, sorting, searching, graph) used in the design of basic algorithms | K ₁ , K ₃ | | |
| 2.0 | Skills | | | |
| 2.1 | Calculate the costs (space/time) of data structures and their related algorithms, both source code and pseudo-code, using the asymptotic notation (O()). | S ₁ | <p>TS-1:lectures</p> <p>TS-2:Giving students tutorials related to the importance of data</p> | <ul style="list-style-type: none"> - Assignments. - Midterm exams - Final Exam. - Lab assessment - Final lab Exam |
| 2.2 | Decide which type of data structures and algorithms best suits the problem they are solving. | S ₁ , S ₂ , S ₅ | | |
| 2.3 | Implement basic algorithms and ADTs using different data structures strategies. | S ₂ , S ₅ | | |
| 3.0 | Values, autonomy, and responsibility | | | |

| Code | Course Learning Outcomes | Code of PLOs aligned with the program | Teaching Strategies | Assessment Methods |
|------|--------------------------|---------------------------------------|---------------------|--------------------|
| 3.1 | | | | |
| 3.2 | | | | |
| ... | | | | |

C. Course Content

| No | List of Topics | Contact Hours |
|--------------|---------------------------------------------------------|---------------|
| 1. | Introduction to data structures and algorithms analysis | 5 |
| 2. | Algorithms Analysis (cont.) | 10 |
| 3. | Stacks and Queues | 10 |
| 4. | Single and Node (double linked) Lists | 5 |
| 5. | Trees | 5 |
| 6. | Binary Search Trees, AVL Tree | 10 |
| 7. | Priority Queues and Heaps | 10 |
| 8. | Sorting | 10 |
| 9. | Maps and Hashes | 10 |
| Total | | 75 |

D. Students Assessment Activities

| No | Assessment Activities * | Assessment timing (in week no) | Percentage of Total Assessment Score |
|----|-------------------------|--------------------------------|--------------------------------------|
| 1. | First Assignment | 5th | 10% |
| 2. | Mid Lab Exam | 7th | 10% |
| 3. | Quizzes | 2th & 7th | 5% |
| 4. | Lab Assessment | continuous | 10% |
| 5. | Final Lab Exam | 14th | 15% |
| 6. | Final Exam | 16th | 40% |

*Assessment Activities (i.e., Written test, oral test, oral presentation, group project, essay, etc.).

E. Learning Resources and Facilities

1. References and Learning Resources

Essential References

1. Data Structures and Algorithms in Java, 6th Edition, by Michael Goodrich, Roberto Tamassia, and Michael Goldwasser, 2014

| Other Learning Materials | |

2. Required Facilities and equipment

| Items | Resources |
|----------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <p style="text-align: center;">facilities</p> <p>(Classrooms, laboratories, exhibition rooms, simulation rooms, etc.)</p> | Classrooms to accommodate 30 students per classroom with desks and chairs, and labs to accommodate 30 students per lab with advanced computers. |
| <p style="text-align: center;">Technology equipment</p> <p>(projector, smart board, software)</p> | Data show, stationaries, smart board, suitable IDE |
| <p style="text-align: center;">Other equipment</p> <p>(depending on the nature of the specialty)</p> | |

F. Assessment of Course Quality

| Assessment Areas/Issues | Assessor | Assessment Methods |
|--------------------------------------------------------------------------------------------------|-------------------|-----------------------------------------------------|
| Collecting students' suggestions to facilitate more during the class. | Students | Verbal discussion |
| Student's questionnaire once during the semester about course learning outcomes. | Students | Indirect Survey |
| Achievement percentage of course learning outcomes, direct evaluation using CLO assessment sheet | Course Instructor | Direct evaluation using CLO achievement calculation |
| Teaching strategies | Quality unit | Indirect |
| Assessment methods | Quality unit | Indirect |
| Instructor performance | Quality unit | Indirect |
| Course content | Quality unit | Indirect |

Assessors (Students, Faculty, Program Leaders, Peer Reviewers, Others (specify))

Assessment Methods (Direct, Indirect)

G. Specification Approval
