

1- Develop a Holistic Interior Design Perspective:
Equip graduates with a well-rounded understanding of interior design, encompassing spatial aesthetics, functional aspects, sustainability, and emerging trends, to align with the dynamic demands of the labor market.

2- Foster a Creative and Collaborative Learning Environment: Foster creativity and awareness among both faculty and students, encouraging their active participation in community engagement and projects that enhance the local living environment and build a competitive edge in the interior design field.

3- Empower Graduates to Drive Innovation:
Develop graduates' proficiency in scientific research, enabling them to devise sustainable interior design solutions that positively influence the local society and address pertinent challenges.

4- Promote Ethical and Leadership Growth:
Enhance graduates' professional and ethical standards, while also honing their communication, leadership, and lifelong learning skills, to instill a sense of national responsibility.

**and contribute to the sustainable development
