

## Annual Student Activity Plan – Department of Biology Academic Year 1447-1448 AH

### **Introduction**

The Student Activities Committee in the Department of Biology aims to foster students' engagement in extracurricular activities and to support their personal, academic, and social development. This plan has been developed based on committee discussions, with consideration of available resources, student interests, and collaboration with the College of Science and Arts.

### **First: Objectives of the Plan**

1. Encourage student participation in extracurricular and university-wide activities.
2. Promote activities that develop students' scientific, cultural, and sports skills.
3. Utilize the department's resources effectively to organize diverse events.
4. Strengthen collaboration between the department and the Student Activities Unit at the College of Science and Arts.
5. Ensure systematic documentation of activities and issue participation certificates to students.

### **Second: Key Areas and Proposed Activities**

#### **1. Academic and Scientific Activities**

- Organizing scientific seminars conducted by faculty members of the department.
- Arranging library visits to introduce students to available academic resources and methods of use.
- Participating in workshops and academic activities organized by the College's Student Activities Committee.
- Organizing student competitions such as poster presentations or research idea contests.

#### **2. Cultural and Social Activities**

- Participating in cultural events organized by the college and university.
- Engaging in national and university occasions (e.g., National Day, Environment Week).

#### **3. Sports and Recreational Activities**

- Forming a departmental football team and organizing friendly matches with other departments.
- Holding table tennis and board games competitions.
- Participating in collective sports activities at the college and university levels.

**Third: Evaluation**

1. Annual report outlining achievements and challenges.
2. Quantitative indicators such as the number of activities conducted and student participation rates.
