

## Course Specification — (Bachelor)

**Course Title:** Information Security

**Course Code:** 190 CIS – 2

**Program:** Technical support

**Department:** Design and management of databases and networks

**College:** Applied College

**Institution:** Najran University

**Version:**

**Last Revision Date:** 2-9-2024

## Table of Contents

<b>A. General information about the course:</b> .....	3
<b>B. Course Learning Outcomes (CLOs), Teaching Strategies and Assessment Methods</b> .....	4
<b>C. Course Content</b> .....	6
<b>D. Students Assessment Activities</b> .....	6
<b>E. Learning Resources and Facilities</b> .....	6
<b>F. Assessment of Course Quality</b> .....	7
<b>G. Specification Approval</b> .....	7

## A. General information about the course:

### 1. Course Identification

#### 1. Credit hours: ( 2 )

#### 2. Course type

A.	<input type="checkbox"/> University	<input type="checkbox"/> College	<input checked="" type="checkbox"/> Department	<input type="checkbox"/> Track	<input type="checkbox"/> Others
B.	<input type="checkbox"/> Required		<input type="checkbox"/> Elective		

#### 3. Level/year at which this course is offered: ( 2 )

#### 4. Course General Description:

This course is to familiarize students with the basic concepts of information systems security. The course aims to determine the security goals, functions, and mechanisms. The content is an introduction to information security, information security and risk management, access control, security architecture and design, physical environmental security, telecommunications and network security, Business Continuity and disaster recovery, application security, and operation security. The choice of appropriate encryption/decryption is the key to the development of an efficient secure information system.

#### 5. Pre-requirements for this course (if any):

None

#### 6. Co-requisites for this course (if any):

None

#### 7. Course Main Objective(s):

By the end of this course students should be able to:

- Explain the objectives of information security.
- Discuss the importance and applications of each of confidentiality, integrity, and availability.
- Analyze issues for creating security policy for a large organization.
- Evaluate vulnerability of an information system and establish a plan for risk management.
- Present issues and solutions in Information System security backgrounds.

- Apply contemporary theories, processes, and tools in the development of information security.

Analyze the local and global impact of information security on individuals, organizations, and society

## 2. Teaching mode (mark all that apply)

No	Mode of Instruction	Contact Hours	Percentage
1	<b>Traditional classroom</b>	30	100%
2	<b>E-learning</b>		
3	<b>Hybrid</b> • Traditional classroom • E-learning		
4	<b>Distance learning</b>		

## 3. Contact Hours (based on the academic semester)

No	Activity	Contact Hours
1.	<b>Lectures</b>	15
2.	<b>Laboratory/Studio</b>	30
3.	<b>Field</b>	
4.	<b>Tutorial</b>	
5.	<b>Others (specify)</b>	
<b>Total</b>		45

## B. Course Learning Outcomes (CLOs), Teaching Strategies and Assessment Methods

Code	Course Learning Outcomes	Code of PLOs aligned with the program	Teaching Strategies	Assessment Methods
1.0	<b>Knowledge and understanding</b>			
1.1	Define major components of Information Security.	Define major components of Information Security.	• Lecture Individual and group discussions	• Exams • Assignment

Code	Course Learning Outcomes	Code of PLOs aligned with the program	Teaching Strategies	Assessment Methods
1.2	Memorize the key Information Security terms.	Memorize the key Information Security terms.	<ul style="list-style-type: none"> <li>Lecture</li> <li>Individual and group discussions</li> </ul>	<ul style="list-style-type: none"> <li>Exams</li> <li>Assignment</li> </ul>
...				
<b>2.0</b>	<b>Skills</b>			
2.1	Analyze different kinds of threats.	Explain the Security Systems Development Life Cycle.	<ul style="list-style-type: none"> <li>Lecture</li> <li>Brainstorming</li> <li>Lecture</li> <li>Small group work</li> </ul>	<ul style="list-style-type: none"> <li>Exams</li> <li>Group reports</li> <li>Exams</li> </ul> Assignment
2.2	Explain the Security Systems Development Life Cycle.	Analyze different kinds of threats.	<ul style="list-style-type: none"> <li>Lecture</li> <li>Brainstorming</li> <li>Lecture</li> <li>Small group work</li> </ul>	<ul style="list-style-type: none"> <li>Exams</li> <li>Group reports</li> <li>Exams</li> </ul> Assignment
...				
<b>3.0</b>	<b>Values, autonomy, and responsibility</b>			
3.1	Demonstrate projects and assignments in teamwork for designing and implementing system security concepts and protecting information system	Demonstrate projects and assignments in teamwork for designing and implementing system security concepts and protecting information system	<ul style="list-style-type: none"> <li>Small group work</li> <li>Group Presentation</li> </ul>	Group report
3.2				
...				

### C. Course Content

No	List of Topics	Contact Hours
1.	Basic concepts of information systems security, security goals, security functions, and security mechanisms	4
2.	Information security and risk management, access control	4
3.	Security architecture and design, physical environmental security	
4.	Lab: Implementing an Information Systems Security Policy	4
5.		
6.		
7	Telecommunications and network security	5
	Business continuity and disaster recovery, application security and operation security	4
	Lab: Implementing a Business Continuity Plan	
	Encryption/decryption, Cryptographic Tools, Examples.	6
	Lab: Cryptool	
	Information Security Models.	6
	Lab: Use OpenSSL to make programs	
	Security Evaluation	6
	Use OpenSSL to make programs	
	Web Security	6
	Use OpenSSL to make programs	
<b>Total</b>		<b>45</b>

### D. Students Assessment Activities

No	Assessment Activities *	Assessment timing (in week no)	Percentage of Total Assessment Score
1.	Monthly Exam	6	20%
2.	Home works	From 2 to 10	10%
3.	practical exam	12	20%
4.	Final exam		50%

\*Assessment Activities (i.e., Written test, oral test, oral presentation, group project, essay, etc.).

### E. Learning Resources and Facilities

Essential References	Michael E. Whitman, Herbert J. Mattord, Principles of information security, Cengage Learning, 2013.

## 2. Required Facilities and equipment

Items	Resources
<b>facilities</b> (Classrooms, laboratories, exhibition rooms, simulation rooms, etc.)	<b>Lecture rooms should be large enough to accommodate the number of registered students</b>
<b>Technology equipment</b> (projector, smart board, software)	<b>Data Show</b>
<b>Other equipment</b> (depending on the nature of the specialty)	

## F. Assessment of Course Quality

Assessment Areas/Issues	Assessor	Assessment Methods
Effectiveness of teaching	Student	Questioners
Effectiveness of Students assessment	Exam paper, course results	Cross-checking
Quality of learning resources		
The extent to which CLOs have been achieved		
Other		

**Assessors** (Students, Faculty, Program Leaders, Peer Reviewers, Others (specify))

**Assessment Methods** (Direct, Indirect)

## G. Specification Approval
