Completed Credit Hours	
Research Title	

Research Problem: *(About 300 words)*

The research problem expresses the study's main topic, its dimensions, motives, nature, which can provoke a series of questions revealing the research's necessity, scientific gap, lack of knowledge. It also deals with a topic deficiency in a current knowledge-based interpretation which needs an improvement, creating an integration towards the findings of similar literature reviews. It is preferred to talk about the research problem at the end of the paragraph, in a form of a declarative statement or question.

Research Objectives *(About 50 words)*

The research objectives specify the purpose of the study and describe what the research is expected to achieve by a project.

Importance of the research *(About 175 words)*

This explains the scientific and practical value, if any, on the completion of the research's objectives.

Vice Deanship for Graduate Studies

Literature Review *(About 500 words)*

A literature review discusses critically published information in a particular subject area, and usually has an organizational pattern and combines both summary and synthesis.

Hypothesis *(About 75 words), (if necessary)*

It is a form of logical prediction or temporary solutions verified by the research via:

- (A) Procedures and research's scientific, analytical and logical steps.
- (B) Statistical evidences and proofs.

Research Methodology and Procedures *(About 250 words)*

- To identify the method used through the units of analysis, research community, research sample, research tools, statistical handling(if required).
- To describe the procedural steps in how to treat the search.

Research Limitation *(About 50 words)*

The limitations of the study are those characteristics of design or methodology that impacted or influenced the interpretation of the findings from your research.

Study's Overall Structure *(About 100 words)*

- Suggests dividing the study into chapters and sections.
- Identifies the proposed timetable for the study's overall execution.

Expected Findings *(About 50 words)*

This is a brief presentation of the research's probable findings, their fields, cognitive additional content, beneficiary sectors, extent of the application of the findings and their impact upon the community service and the environment progress.

Definition of Terms *(About 150 words), If necessary*

Research and References *(About 250 words)*

They include a list of preliminary relevant sources and references that were used in the study. This must be done in compliance with the principles of the Manual of Scientific Thesis Writing, approved by the university.
