

The report of following up the implementation of some plans of improving the fourth standard concerning the recommendations of external reviewers

Name of College: Computer Science and Information Systems

Number of College programs: 2

Note: The activity/targeted that is fully completed is referred to as "achieved". Implementation of an activity is in progress is referred to as "Not achieved".

S	Targeted	Name of Program1 Computer Science		Name of Program2 Information Systems		Notes
		Achieved	Not achieved	Achieved	Not achieved	
1	Forming committees in the academic programs in cooperation with colleges' strategic planning committees to review the program's mission with the possibility of being restricted only to the educational aspect without the scientific research and community service aspects.	Achieved		Achieved		

The template should be repeated in case there are more than three programs at the College

		Name of Program1 Computer Science		Name of Program2 Information Systems		
S	Targeted	Achieved	Not achieved	Achieved	Not achieved	Notes
2	Linking the program mission and objectives to the program Learning Outcomes.	Achieved		Achieved		
3	The research activities and community services should be involved in the missions of departments and colleges, not in the programs' missions..	Achieved		Achieved		

The template is replicated if there are more than three programs at the College

		Name of Program1 Computer Science		Name of Program2 Information Systems		
S	Targeted	Achieved	Not achieved	Achieved	Not achieved	Notes
4	Forming the internal review committees in the academic programs.	Achieved		Achieved		
5	Reviewing all program specifications by internal review committees - in light of the program modified mission - to be consistent with the NCAAA form, ensuring that the programs' Learning Outcomes are written by using action verbs and stated as measurable competences in the Learning Outcomes domains that cope with the program and are no more than 14 Learning Outcomes, ensuring that they are complete, consistent and accurate.	Achieved		Achieved

	quality programs which did not accomplish this step (included in program review)					
9	Ensuring getting the benefit from reports of reviewing and evaluating the program specification in all the reviewing stages by the program Coordinator.	Achieved			Achieved	
10	The course teacher should review and modify the course specification based on the reports of reviewing the course specification in all stages of reviewing under the supervision of the program Coordinator.	Achieved			Achieved	
11	Discussing reports of reviewing and the modified specifications in the Departments' Councils and in the meetings of the Advisory Committees.	Achieved			Achieved	

The template is replicated if there are more than three programs at the College

		Name of Program1 Computer Science		Name of Program2 Information Systems		
S	Targeted	Achieved	Not achieved	Achieved	Not achieved	Notes
12	Sending the program specifications and all review reports to Teaching and Learning Unit at the Deanship of Development and Quality for evaluation.	Achieved			Achieved	
13	Tackling the minor and major changes in the program according to the University system and NCAAA criteria (in case of major changes, the program must be accredited by Vice-Rectorship for Academic Affairs).	Achieved			Achieved	
14	Preparing a “program File” which includes the program current files and its modified ones; all processes inside the Program File must be documented in the Program File	Achieved		Achieved		
15	Conducting training programs for the Faculty Members, specially the novice ones, in all academic programs, such as "Program Specifications and "Course Specifications"..	Achieved		Achieved		
16	Preparing an action plan in every program to accomplish all processes of revision and	Achieved		Achieved

	modification under the supervision of the college Technical Support Provider at the Deanship of Development and Quality –The reviewing and modification processes should end by 21 Jumadal-Awwal1437-1 st March 2016.					

**Percentage of achievement of the Computer Science program:

$$\frac{\text{Number of accomplished activities (16)}}{\text{Total number of accomplished activities (16)}} = 100 \%$$

**Percentage of achievement of the Information System program:

$$\frac{\text{Number of accomplished activities (16)}}{\text{Total number of accomplished activities (16)}} = 100 \%$$

Approved by, Dean of College
