College of Computer Science and Information Systems organizes an orientation program for the newly admitted students at the college premises each term. The ultimate objective of this program is to make the students aware of the academic aspects, rules, and regulations of the college and to ensure that the students are able to absorb and distinguish the various tracks associated with CS program. Thus, they will eventually have a comprehensive understanding to determine their right tracks and future career paths.

Incoming domestic undergraduate first-year- students are required to attend the orientation day. Through this experience, students gain Info about their academic program , enrollment matters , are introduced to social and cultural expectation of the campus and network with their mates in a small group setting.

The head of CS program inaugurate our orientation program while the head of Student Activity Unit must get involved as well. During the orientation, students are navigated through CS program in depth by clarifying all academic aspects including academic requirements, success , advising , and also course registration.

In addition, students are given a calendar details all of the activities happening in the term they enrolled in . Through these activities, new coming students are able to build a robust background academically and socially. There are a variety of activities related to the programs as well as other social activities where first-year students can meet their peers and share the experience together.
