The Report of Improvement Plan of the program (Annual)

For –Computer Science Programs

Najran University
Computer Science and Information System College

27-4-2017

1. Introduction:

The program is reviewed from time-time and changes are discussed at the department council level and college council level.

The following points are highlights of the planned improvement of the program for the academic year 2015-16 (semester 361-362).

- The Course instructors suggests some improvements for the course in each semester. These suggestion are discussed in the department council and college council.
- In addition the curriculum and other activities are discussed from time to time for improvements in the program, like in January-February 2016 the CLO-SO mapping for each course was reviewed by the knowledge group, to improve the mapping or remove the anomalies. The knowledge groups discussed Course Specification and course syllabus.
- The college also plans to developed a link in the www.nucsis.info website to reflect the curriculum changes which are adapted including course specification and course syllabus.

2. Data

- Overall Course reports highlights the improvements strategies at different levels.

3. Analysis(part of the report)

4. Recommendations

- It is observed that due to delay in submitting the “Course Reports” by the course instructors. The overall discussion for the improvements in the program at course level is getting delayed. Hence some of the improvements discussions and their implementation is getting delayed.
- The Assessment cycle is about to end in the year 2015-16. Hence a new assessment cycle should be planned for the program for improvement.

5. Conclusion

The analysis of the report for “Improvement plan in the program” is part of the “Overall course reports itself.

The evidence attached are a sample from the steps taken by the college in forming the knowledge groups and email exchanges about the mapping CLO-SO.
